

Hello IEOR Students!

Please review the following Q&A to help clarify questions concerning the IEOR curriculum.

Q: Which curriculum do I follow?

A: Please review the curriculum page. They are posted according to admit date. Students admitted Fall07 and thereafter should follow the second curriculum. Students admitted Prior to Fa07 may choose but, Please DO NOT mix and match and combine the two programs. If you started the first curriculum it should be finished to completion.

Q: I don't have the 60 units of approved engineering curriculum required as a pre-req to take E120, but the new curriculum says to take E120 during the sophomore year?

A: The requirement has been changed and you are only required to have completed 45 units of approved engineering curriculum to take E120.

Q: What requirement does IEOR 140 fulfill?

A: If you are following the first curriculum (admits prior to Fa07 only) IEOR 140 counts as a java (or C++) course.
If you are following the second curriculum (admits Fa07 and after) IEOR 140 counts as an engineering elective (Please note: IEOR 140 as an engineering elective requires a java programming course)

Q: What requirement does IEOR 172 fulfill?

A: If you are following the first curriculum you must submit (admits prior to Fall 07) a petition to have IEOR 172 count as a statistics course. You also need to assure that you will still have completed 30 Science units.
If you are following the second curriculum, no petition is required and you may take either IEOR 172 or Stat 134 to fulfill your
